- Amazon Elastic Transcoder
- Amazon Simple Workflow Service (SWF)

Application Integration

Step Functions
Amazon MQ
Simple Notification Service
Simple Queue Service
SWF

Networking & Content Delivery

VPC
CloudFront
Route 53
API Gateway
Direct Connect
AWS App Mesh
AWS Cloud Map
Global Accelerator [↗](#)

Media Services

Elastic Transcoder
Kinesis Video Streams
MediaConnect
MediaConvert
MediaLive
MediaPackage
MediaStore
MediaTailor

AWS Miscellaneous Application Services

Step Functions

- Building applications from individual components that each perform a discrete function lets you scale and change applications quickly; Step Functions provides a graphical console to arrange and visualize the components of your application as a series of steps

API GW

- Amazon API Gateway handles all the tasks involved in accepting and processing concurrent API calls, including traffic management, authorization and access control, monitoring and API version management

AWS Miscellaneous Application Services

Elastic Transcoder

- Amazon Elastic Transcoder is media transcoding in the cloud; you can to convert (or transcode) media files from their source format into versions that will play back on devices like smartphones, tablets, and PCs

SWF

- Amazon Simple Workflow Service (SWF) makes it easy to build applications that use Amazon's cloud to coordinate work across distributed components; SWF tracks the state and coordinates tasks of background jobs of your apps
