- **AWS X-Ray**

Developer Tools

- CodeStar
- CodeCommit
- CodeBuild
- CodeDeploy
- CodePipeline
- Cloud9
- X-Ray

AWS CodeCommit

AWS Miscellaneous Developer Tools Services

- **AWS CodeCommit** is a fully managed source control service that makes it easy for companies to host private Git repositories

CodeCommit

- **AWS CodeBuild** is a fully managed build service that compiles source code, runs tests, and produces software packages that are ready to deploy

CodeBuild

- **AWS CodeDeploy** is a service that automates code deployments to any instance, including EC2 instances and instances running on premises

CodeDeploy

AWS Miscellaneous Developer Tools Services

- AWS CodePipeline is a continuous integration and continuous delivery service for fast and reliable application and infrastructure updates; CodePipeline builds, tests, and deploys your code every time there is a code change

CodePipeline

- AWS X-Ray helps developers analyze and debug distributed applications in production or under Development; with X-Ray, you can understand how your app is performing so you can identify and tshoot the root cause of performance issues and errors

X-Ray

AWS Certified Cloud Practitioner Training Bootcamp
