# AWS Miscellaneous Artificial Intelligence Services

- Amazon Lex is a service for building conversational interfaces into any application using voice and text; Lex brings automatic speech recognition (ASR) for converting speech to text and natural language understanding (NLU) to recognize the intent of the text

Lex

- Amazon Polly is a service that turns text into lifelike speech; Polly is an Amazon artificial intelligence (AI) service that uses advanced deep learning technologies to synthesize speech that sounds like a human voice

Polly

AWS Miscellaneous Artificial Intelligence Services

- Amazon Rekognition is a service that makes it easy to add image analysis to your applications; With Rekognition, you can detect objects, scenes and faces in images

  Rekognition

- Amazon Machine Learning (ML) is a service that makes it easy for developers of all skill levels to use machine learning technology; Amazon ML provides visualization tools and wizards that guide you through the process of creating ML models without having to learn complex ML algorithms and technology

  Machine Learning

AWS Certified Cloud Practitioner Training Bootcamp
